

## BRUMAC **Derma San**

### **1. Description**

**Brumac Derma San** is a non alcohol blend of cationic surfactants, non-ionic surfactants and excipients for removal of pathogens on hands and arms. It is a liquid formulation for the ease of spreading over areas to be treated.

### **2. Application**

Apply a liberal amount of **Brumac Derma San** to the palm of your hand. Rub it over the whole surface of the hands, including between fingers and under nails. Your hands may feel slightly sticky for a very short time. This stickiness will disappear, leaving a layer of active product on your skin surface.
